

CARING FOR PARENTS IN A PREGNANCY AFTER LOSS

Purpose of study: We are recruiting maternity services to complete an online survey that aims to identify services and models of care available to parents in a pregnancy after loss.

Who should complete the survey: The survey should be completed by someone with detailed knowledge of the models of care options available in your service such as the Director of Obstetrics & Gynaecology or Midwifery. Each maternity service should complete the survey once.

Please email the Stillbirth CRE to find out if your service has completed the survey: stillbirthcre@mater.uq.edu.au

Complete the survey here:
